Etsy listing: Blush Garden Rose Wedding Website (design 03)

Internal listing kit for the seller (G059, 2026-10-14). Not published on Etsy. Theme `blush-garden-rose`. Built with `python3 tools/listing_kit.py all --theme blush-garden-rose`; text written by hand. Product language: English (US spelling). Commercial fields stay as placeholders until the shop owner decides them.

0. Status before publishing

Item	Status on 2026-10-14
Start link `https://davetiye-platform-five.vercel.app/start?theme=blush-garden-rose`	**Live**: answers 200 with the start form naming the design (checked 2026-10-14 through the Vercel connector, deployment `dpl_2wNCu8cwSnw4PcWpQ2pTqcGjbdTC` = main `59b1291`, whose platform code is the same as this kit's; not opened on a phone, QR not scanned with a phone camera).
Live demo `https://davetiye-platform-five.vercel.app/start/demo/blush-garden-rose` (image 8)	**Live** (200, 2026-10-14, Vercel connector). It shows the sample names with placeholder photos, as on the /start page.
Add to calendar	**Live**: the live demo's Details page shows the Apple / Outlook and Google buttons (2026-10-14, Vercel connector).
Questions & answers, RSVP questions	In the live deployment (same platform code), tested in a local production build (Chromium, phone size). **Not tried on the live site**: the live demo has none, and the live check script does not cover them.
Real phones (iPhone Safari, Android Chrome)	**Not tested.** All phone checks so far are Chromium mobile emulation.
Edit link by email	**Not built.** The buyer copies the link or uses "Email it to myself" (their own mail app).

Item	Status on 2026-10-14
Etsy order check	**Not built.** `/start` checks only the number's format and allows one website per number (docs/10 §3: Etsy API check later).
Web address	`davetiye-platform-five.vercel.app` is a temporary address. Buyers print the QR codes: choose the final domain before the first sale (or keep a permanent redirect from this one).
Hosting plan, hosting period, price, support, refunds, privacy notice	Not decided: placeholders below.
Screens in the images	Real screens of the platform (local production build of this repo, 390 px phone size, with the live base URL configured). Sample names, photos, replies and order number are fictional. A screen is moved or cut shorter so that nothing is cut at its edges; a bottom sheet is shown on the editor's plain background; the local-only QR code is replaced by a labelled box.

VERIFY markers below come out only after the test is done; if a test fails, delete or rewrite that sentence. `python3 tools/listing_kit.py check --theme blush-garden-rose --prepublish` fails while any is left.

1. Title

Etsy limit: 140 characters. This title: 108 characters.

```
Blush Garden Rose Wedding Website with RSVP, Envelope Opening Digital Invitation, Online Editor, Pink Floral
```

2. Description

Paste from the line below.

A wedding website that opens like a real envelope, with online RSVP built in. You fill it in yourself in an online editor and share one link with your guests.

Blush peonies, garden roses and a soft pink envelope tied with a silk bow. Your guests tap the envelope, it opens, and your invitation follows: Home, Our Story, Details and RSVP.

WHAT YOU GET

- A wedding website in the Blush Garden Rose design: envelope opening, Home, Our Story, Details and RSVP pages.
- A web address with your names, for example .../clara-and-julian (you choose it when you start).
- An online editor made for phone screens that also works on a computer. [VERIFY: real iPhone Safari and Android Chrome] Change names, date, ceremony time, venue, the order of the day (up to 10 events), dress code, story captions, links and photos. Every change saves by itself; your guests see it after you press Publish.
- Your own photos: a portrait for the invitation card, three Our Story photos and a venue photo, each cropped to the design's shape in the editor.
- Online RSVP: guests reply on your website. You see every reply, the head count and the answers in your editor, and you can download all replies as a spreadsheet (CSV).
- Up to 3 questions for your guests in the RSVP form, for example a meal choice. [VERIFY: try on the live site]
- Add-to-calendar buttons (Apple / Outlook and Google Calendar).
- Questions & answers for your guests, up to 12, on the Details page. [VERIFY: try on the live site]
- A countdown to your day, map, travel & stay and registry buttons (with your own links).
- A QR code of your website to download (PNG or SVG) for printed cards and signs.
- A START HERE guide (PDF) with the start link and every step in pictures.

HOW IT WORKS

1. Buy and download the START HERE PDF from your Etsy purchases.
2. Open the start link in the PDF and enter your Etsy order number, email and first names. Your website starts as a private draft.
3. Save your edit link (we cannot email it to you yet), then fill in your details and add your photos.
4. Press Publish and share your link, or print the QR code.

No Canva account, no app and no design skills needed. Your guests need no app and no account either.

PLEASE NOTE

- This is a digital product. Nothing is printed or shipped.

- You change your names, date, times, venue, schedule, dress code, story captions, questions & answers, RSVP questions, links and photos. The design's headings (for example "You are invited", "Order of the Day", "Will You Join Us?"), the painted design and the colors stay as they are.
- The website's headings, buttons and RSVP form are in English. You can write your own texts (names, schedule, story captions, Q&A) in another language: letters with accents (é, ñ, ü) and Cyrillic use the design's fonts; other alphabets (for example Greek, Arabic or Chinese) may show in a plain standard font.
- One website per order. The web address cannot be changed after you start.
- Your website stays online for [HOSTING PERIOD].
- A custom domain (for example yournames.com) is not included.
- No music is included.
- The sample names, dates, places and photos are fictional and are not part of your website.
- The painted design elements and the sample photos were made with AI image tools from our own descriptions, then edited and assembled by us. [VERIFY: Etsy AI disclosure wording and the "Designed by" setting]
- [REFUND POLICY]

QUESTIONS? Message [SHOP NAME] on Etsy or write to [SUPPORT EMAIL]. We answer within [SUPPORT RESPONSE TIME].

---

3. Tags

Etsy: 13 tags, each up to 20 characters. Keyword choices are hypotheses (no search-volume data used). No other company's brand name in tags.

4. Category and attributes

Values must be picked from Etsy's own lists in the listing editor. [VERIFY: every row in the listing editor]

Field	Suggestion
Category	Paper & Party Supplies › Paper › Invitations & Announcements › Invitations (or the closest digital wedding category Etsy offers)
Type	Digital files
Who made it	I did [VERIFY: the "Designed by" option for designs made with AI image tools]
What is it	A finished product
When was it made	Made to order (choose what Etsy offers for digital items)
Occasion	Wedding
Primary color	Pink
Secondary color	Cream (or Beige)
Style / theme	Classic, Romantic, Floral (if offered)
Personalization	Off (the buyer fills in the website)
Digital file	`START_HERE.pdf` from `package/customer/` (Etsy: up to 5 files, 20 MB each)
Price	[PRICE]
Quantity	[QUANTITY]
Shop section	[SHOP SECTION]
Renewal	[AUTO RENEW: yes/no]

5. Images and alt text

Upload the 8 images in this order (Etsy allows up to 20; 2000 px or more recommended). Files are PNG, about 3–4 MB each; Etsy compresses them. [VERIFY: upload size accepted in the listing editor]

#	File	Alt text
1	`01_cover.png`	Blush Garden Rose wedding website with RSVP on two phone screens: a pink envelope tied with a silk bow, and the home page with the couple's photo. Labels: no Canva needed, RSVP built in, live demo
2	`02_guest_pages.png`	The five pages guests see: envelope, home, our story, details and RSVP
3	`03_whats_included.png`	What is included: website, online editor, RSVP with your own questions, add to calendar, questions and answers, QR code, START HERE guide
4	`04_how_it_works.png`	Three steps: start with your Etsy order number, personalize in the editor, publish and share
5	`05_editor.png`	The online editor: date and time, cropping a photo, previewing the website
6	`06_rsvp.png`	RSVP: the guest reply form with a meal question, the list of replies with a CSV download, and the questions editor
7	`07_details.png`	Details page: order of the day with add to calendar buttons, the venue, questions and answers
8	`08_live_demo.png`	QR code that opens the live demo of the Blush Garden Rose design. [VERIFY: Etsy policy on QR codes and links in listing photos]

6. Video

`package/listing/video.mp4` : the envelope opening, recorded from the real website (sample names). Silent, square, under 15 seconds (exact length in the generated section below); it starts on the closed envelope and its last half second dissolves back into it, so Etsy's loop has no black flash. Rule check in the generated section below. Etsy's rules could not be opened directly from this environment; the values used come from web-search excerpts of

Etsy's help pages on 2026-10-14 (5–15 s, up to 100 MB, at least 500 px, no sound). [VERIFY: in the listing editor]

7. FAQ (for the listing or the shop FAQ)

Do I need Canva or an app? No. You fill in your website in your web browser, on your phone or computer. Your guests only need the link.

How do I get my website after I buy? Download the START HERE PDF from your Etsy purchases. Open the start link inside it and enter your Etsy order number.

Can I see it before I buy? Yes: open the live demo (image 8). It shows sample names and placeholder photos.

What can I change? Your names, date, times, venue, schedule, dress code, story captions, questions & answers, RSVP questions, links and photos. The design's headings (for example "You are invited", "Order of the Day", "Will You Join Us?"), the painted design and the colors stay as they are.

Is it available in other languages? The design's headings, buttons, RSVP form and calendar texts are in English. Your own texts can be in another language: letters with accents and Cyrillic use the design's fonts; other alphabets may show in a plain standard font. Dates can be written in US, UK, Canadian or Australian style.

How do my guests reply? On your website's RSVP page. You see every reply in your editor and can download them as a spreadsheet (CSV).

Can I change things after I publish? Yes. Edit, then press Publish changes.

Can I use my own domain? Not at the moment. Your address is a link with your names.

How long does my website stay online? [HOSTING PERIOD]

Is it printed or shipped? No. It is a digital product.

I lost my edit link. What now? Message us on Etsy with your order number. [LOST LINK POLICY]

8. Message to buyers (Etsy's automatic message for digital items)

Thank you for your order! Download START_HERE.pdf from your Etsy purchases (Purchases and reviews → Download files). Open the start link inside it and enter your order number to

create your website. Please save your edit link when it appears. Questions? Message [SHOP NAME] here on Etsy.

9. Before you publish this listing

☑ Theme and current platform live: start link, demo and add to calendar answer on the live site (Vercel connector, 2026-10-14; not on a phone)

☐ Start link and demo opened on a real phone; the QR in START_HERE.pdf and the QR of image 8 scanned with a phone camera

☐ Questions & answers and RSVP questions tried on the live site

☐ Buyer journey tried on a real iPhone (Safari) and Android phone (Chrome)

☐ Final domain chosen before the first sale (or a permanent redirect from davetiye-platform-five.vercel.app committed); START_HERE.pdf, its QR and image 8 rebuilt with it (`LISTING_BASE_URL`)

☐ Commercial hosting plan decided (Vercel Hobby is non-commercial, docs/10 §3)

☐ Etsy policy fit checked for selling access to a hosted website via a PDF link with a hosting period

☐ Hosting period, price, refund policy, support email and response time, lost-link policy, privacy notice decided and filled in (guide + listing)

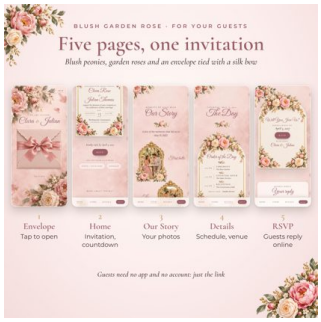

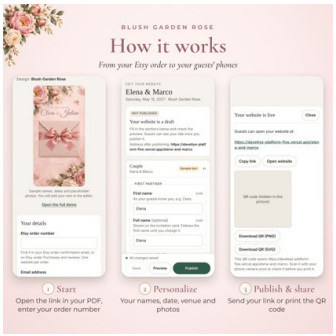

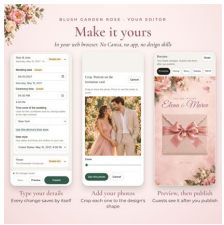

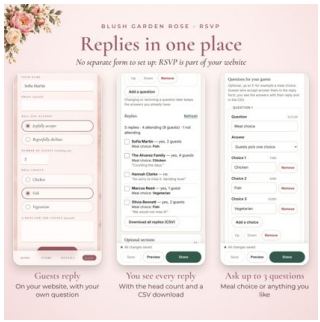

☐ Etsy rules re-checked in the listing editor (title, tags, images, video, AI disclosure, "Designed by")

☐ START_HERE.pdf and this PDF rebuilt after the placeholders are filled (`python3 tools/listing_kit.py pdf --theme blush-garden-rose`)

☐ `python3 tools/listing_kit.py check --theme blush-garden-rose --prepublish` passes (live links, image 8's QR, no VERIFY or placeholder left)

Images (generated by tools/listing_kit.py)

Upload in this order. Files: `package/listing/images/`.

The cover as buyers see it first (generated)

Left: 300 px wide, about the size of a search result. Right: the centred 4:3 crop (2000 × 1500), in case Etsy shows the thumbnail cropped (not verified; the listing editor lets you adjust the thumbnail). The theme name, "Wedding Website · RSVP", both phones and the three labels must stay readable in both.

300 px	4:3 centre crop

Video (generated)

Field	Value
File	`package/listing/video.mp4`
Length	14.13 s
Size	2.04 MB
Frame	1080 × 1080 px, 30/1 fps, h264
Sound	none
Etsy rules used	5–15 s, ≤ 100 MB, ≥ 500 px — 2026-10-14, web-search excerpts of help.etsy.com (direct fetch refused) — UNVERIFIED
