Start Here: Your Olive & Ivory Wedding Website

Thank you for your order from [SHOP NAME]. This guide takes you from your Etsy purchase to a published wedding website your guests can open on their phones. Keep this PDF: your start link is inside.

Your start link

> **Open this link to start your website:**
>
> https://davetiye-platform-five.vercel.app/start?theme=olive-ivory

Or scan this code with your phone camera:

The link opens the Olive & Ivory design. Everything happens in your web browser: the editor is made for phone screens and also works on a computer. There is nothing to install and you do not need a Canva account.

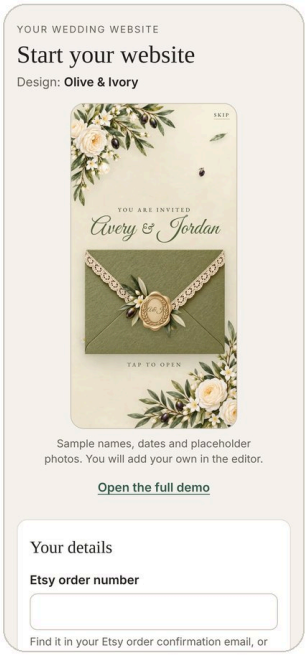

What you need

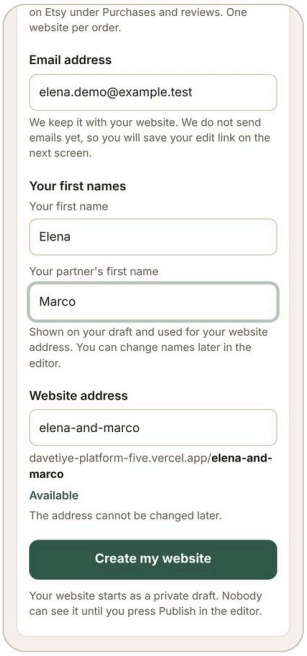

- Your **Etsy order number**. You find it in your Etsy order confirmation email, or on Etsy under **Purchases and reviews**. Only the digits matter: "Order #1234567890" is fine.
- An **email address** (we keep it with your website).
- Your **names, wedding date, ceremony time and venue**.
- Up to **5 photos**: a portrait for the invitation card, three photos for Our Story and one of your venue. You can add them later.
- About 20 to 30 minutes. Everything saves as you go, so you can stop and come back.

Step 1: Start your website

1. Open your start link. You see the Olive & Ivory design with sample names (Avery & Jordan) and a link to **Open the full demo**.
2. Under **Your details**, enter your **Etsy order number**, your **email address** and your **first names**.
3. Check the **Website address**. It is made from your names, for example `elena-and-marco`. You can change it now, but **not later**. If an address is taken, the page suggests another one.
4. Tap **Create my website**. Your website starts as a **private draft**: nobody can see it until you publish it.

One website can be started per order number.

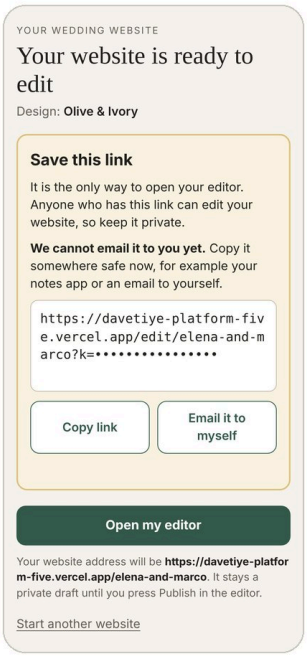

Step 2: Save your edit link

The next screen shows your **edit link**. It is the only way to open your editor, so keep it safe and private: anyone who has it can change your website.

- Tap **Copy link** and paste it somewhere safe, for example your notes app.
- Or tap **Email it to myself**: this opens your own email app with the link in a new message. Send it to yourself.
- We **cannot email the link to you yet**, so please save it now.

Then tap **Open my editor**.

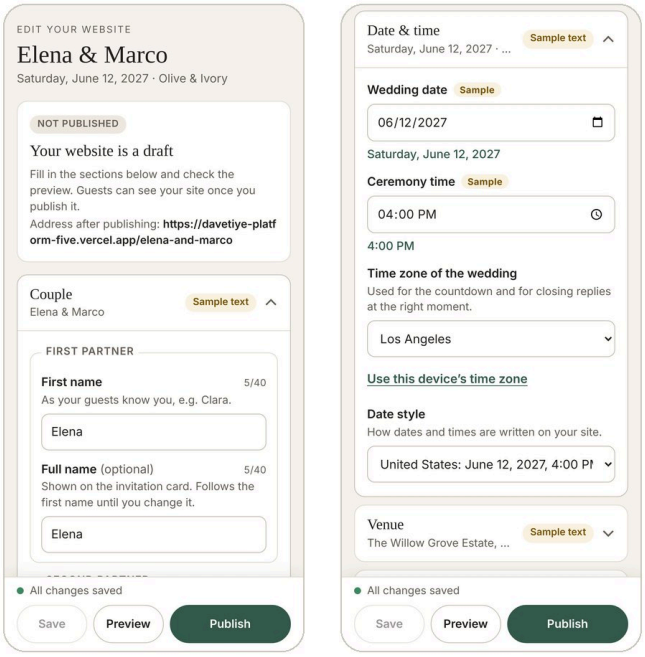

Step 3: Fill in your details

The editor is one page with sections. Tap a section to open it:

Section	What you change
Couple	First names, full names (shown on the invitation card), "Names as shown", host line
Date & time	Wedding date, ceremony time, time zone, date style (United States, United Kingdom, Canada or Australia)
Venue	Venue name, address, city, region and country
Schedule	The order of the day: up to 10 events with time and place
Story	The intro line and a short title for each Our Story photo
Details	Dress code, map link, travel & stay link, registry links
Questions & answers	Up to 12 questions and answers for your guests
RSVP	Reply-by date, up to 3 questions for your guests, and your replies
Optional sections	Turn Our Story, Countdown, Dress code, Registry, Travel & stay and Questions & answers on or off

Section	What you change
Photos	Your 5 photos

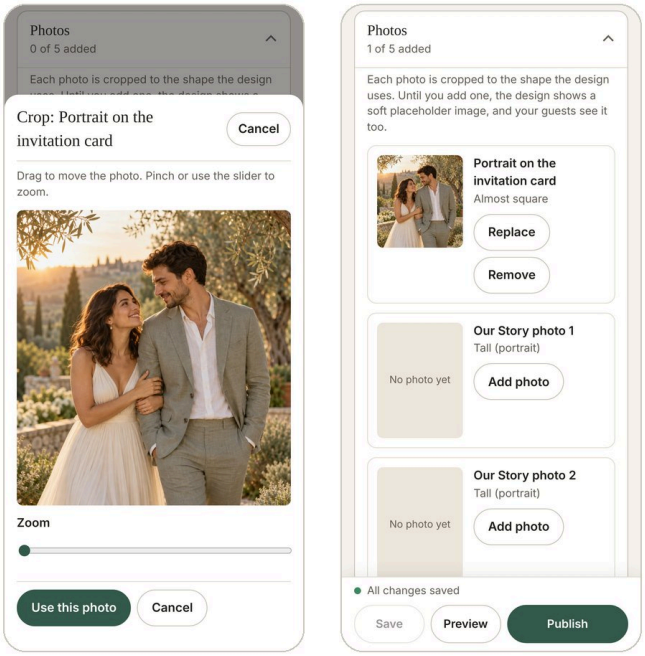

- Values that still come from the design's sample are marked **Sample**. Replace them with your own.
- Every change **saves by itself**. The bar at the bottom says "All changes saved".
- Tap **Preview** at any time to see your website as your guests will.

Step 4: Add your photos

1. Open **Photos** and tap **Add photo** next to a photo place.
2. Choose a photo. Drag it to move it, pinch or use the slider to zoom, then tap **Use this photo**.
3. Each photo is cropped to the shape the design uses. You can **Replace** or **Remove** it later.

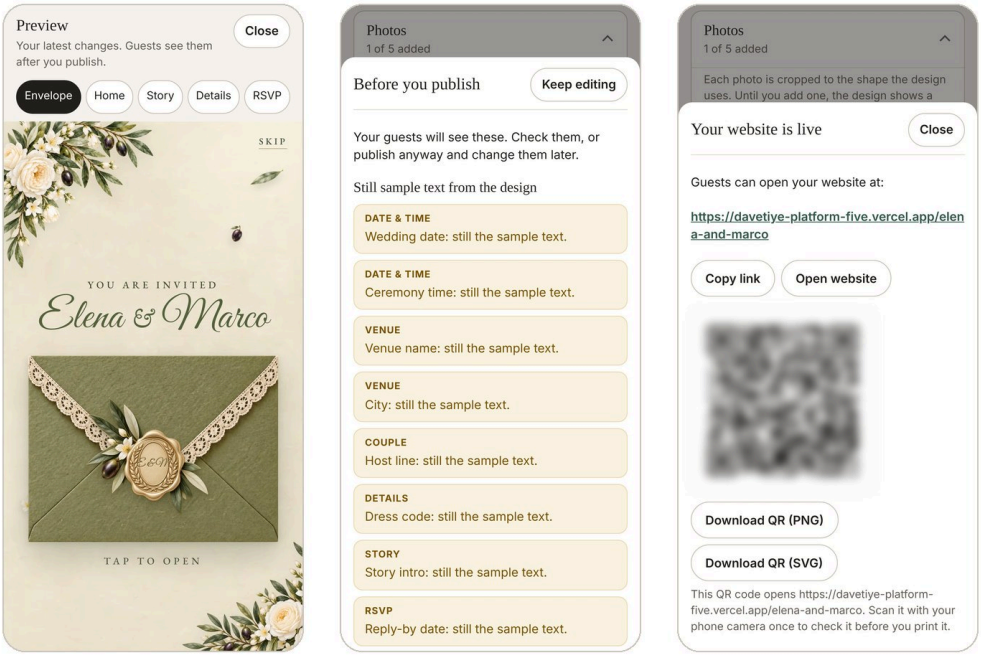

Tips: JPEG and PNG photos work everywhere. iPhone HEIC photos open only in Safari; in other browsers choose a JPEG copy. Each photo can be up to 30 MB. Until you add a photo, the design shows a soft placeholder image, and your guests see it too.

Step 5: Preview and publish

1. Tap **Preview** and look through Envelope, Home, Story, Details and RSVP. Tap **Close** to go back.
2. Tap **Publish**. If something still shows sample text or a photo place is empty, **Before you publish** lists it. Tap an item to go to it, or tap **Publish anyway** and change it later.
3. **Your website is live** shows your website address, **Copy link**, **Open website** and a QR code.

Later changes: edit as before, then tap **Publish changes**. Your guests see changes only after you publish them. **Take the website offline** hides it again (your content is kept).

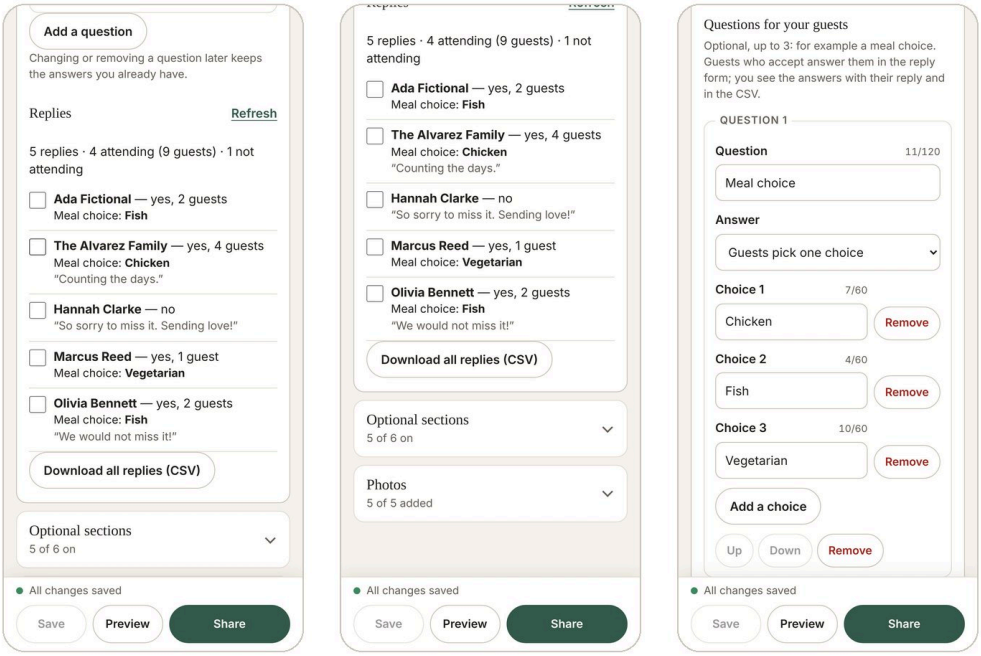

Step 6: Share it with your guests

- **Copy link** and send it by text message, WhatsApp, email or social media. Your website address looks like `https://davetiye-platform-five.vercel.app/your-names`.
- **Download QR (PNG)** or **Download QR (SVG)** to print the code on paper invitations or signs. Scan it once with your phone camera before you print.
- Your guests do not need an app or an account. They tap the envelope to open your invitation.

Step 7: See your replies

Open **RSVP** in your editor:

- The reply count, how many guests are coming and who declined.
- Each reply with the guest's answers to your questions (for example "Meal choice: Fish").
- **Refresh** loads new replies. **Download all replies (CSV)** gives you a spreadsheet for Excel, Numbers or Google Sheets.
- To delete a spam or duplicate reply, tick it and tap **Remove selected**.
- Replies close at the **end of your reply-by date**, in your wedding's time zone.

What your guests see

1. **The envelope**: your names on a closed envelope. A tap opens it.
2. **Home**: your portrait card, names, date, venue, a countdown, the invitation card, add-to-calendar buttons and RSVP.
3. **Our Story**: your three photos with short titles.

4. **Details**: the order of the day, dress code, venue, map, travel & stay, registry and your questions & answers.
5. **RSVP**: guests reply with their name, whether they come, how many guests and your questions.

Questions and troubleshooting

I lost my edit link. Look for the message you sent to yourself in Step 2. If you cannot find it, message [SHOP NAME] on Etsy with your order number. [LOST LINK POLICY: how and when the shop sends a new edit link]

"A website has already been started with this order number." Each order starts one website. Open it with the edit link you saved. If you did not start it, message us on Etsy.

"This start link is not valid." Open the start link from this PDF again, or pick your design from the list on that page.

The website address I want is taken. Use the suggested address or add a word, for example `elena-and-marco-wedding`.

My photo does not upload. Use a JPEG or PNG photo up to 30 MB. On iPhone, Safari can also read HEIC photos.

My guests do not see my changes. Tap **Publish changes** in the editor.

Can I change the address later? No. Choose it carefully in Step 1.

Can I use my own domain (for example yournames.com)? Not at the moment.

How long does my website stay online? [HOSTING PERIOD]

Can I change the colours or fonts? No. You change all the text and photos; the painted design stays as it is.

Help

Message [SHOP NAME] on Etsy, or write to [SUPPORT EMAIL]. We answer within [SUPPORT RESPONSE TIME].

Privacy: your guests' replies are stored with your website and are visible only in your editor. [PRIVACY NOTICE LINK]

The sample names, dates, places and photos in the design are fictional. Replace them with your own before you share your website.
